

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

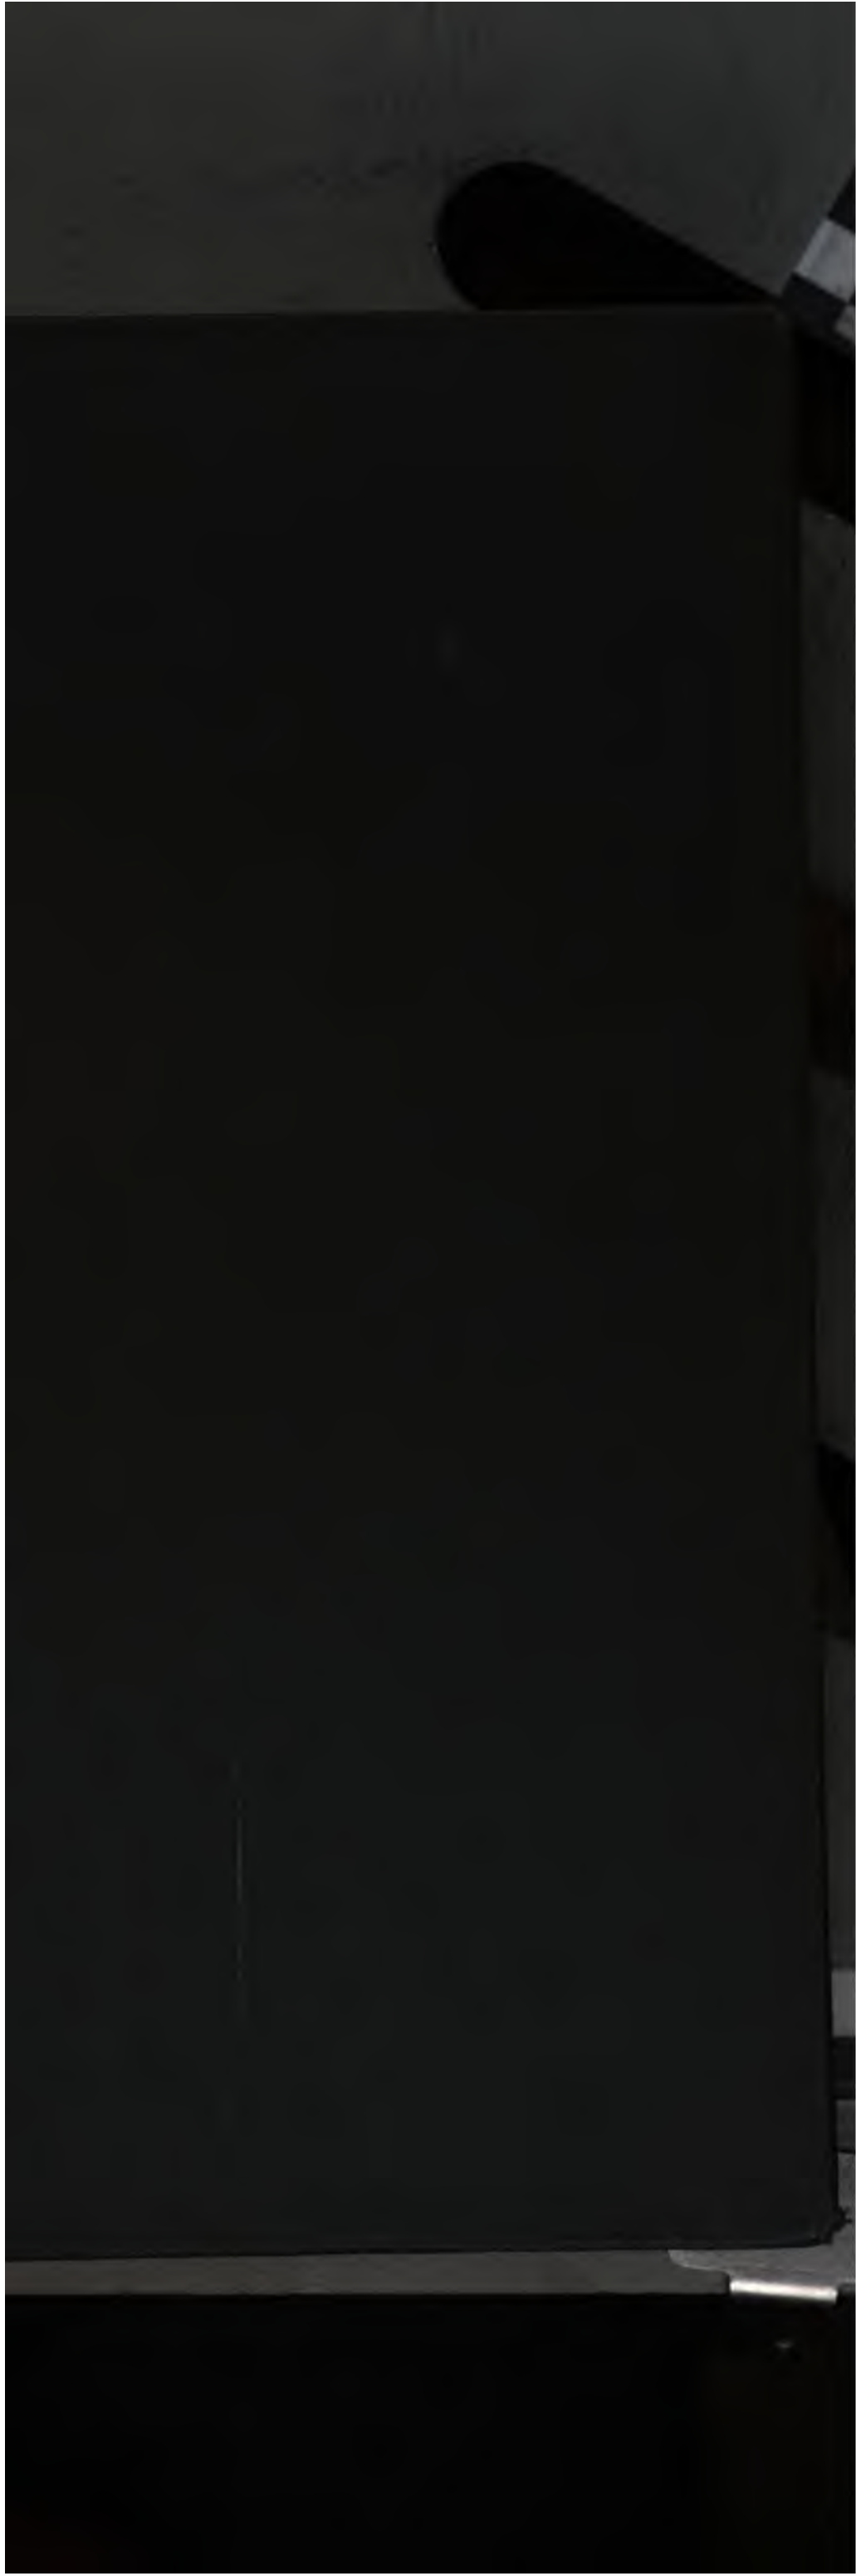

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

APPENDIX.

TRAFFIC UNDER DRAWLESS BRIDGES.

The Mayors of Boston and Cambridge, *ex-officio*, and Mr. E. D. Leavitt, constitute the Cambridge Bridge Commission, which is charged with the construction of a new bridge to replace the present West Boston bridge over the Charles river. In the opinion of the Commissioners the projected Cambridge bridge should be constructed without a draw, and plans have been prepared in accordance with that opinion.

The Legislature of Massachusetts has sanctioned the plan of a drawless bridge. (See chapter 180, Acts of 1899.) The consent of the United States Government to the construction of such a bridge being necessary, a Board of Engineers of the United States Army, acting as the representative of the Government, took the question of granting consent under advisement.

The adverse report of the Board of Engineers, dated May 19, 1899, has been sustained by the Secretary of War.

The following data regarding the use of drawless bridges in the cities of Berlin, London and Paris have been compiled by this Department at the request of the Cambridge Bridge Commissioners, and were presented on their behalf at the hearing before the Board of United States Engineers, held on April 12, 1898.

BERLIN.

Berlin, situated on the River Spree, is the principal inland port of Germany, with the sole exception of Emmerich-on-the-Rhine. The distance of Berlin from Hamburg (at the mouth of the Elbe on the North sea) is given as 177 English miles. Berlin is 84 miles distant from Stettin, at the mouth of the Oder on the Baltic sea. It lies about midway between the Elbe and the Oder, and is connected with each by means of navigable ship canals, so that freight from Hamburg can be carried through Berlin, and thence by ship canals to Breslau, in Silesia, which is 205 miles from Berlin.

The principal arm of the Spree is navigable for craft of from 8,000 to 10,000 centners burden. Reckoning the centner at 110 pounds, the tonnage of such craft would amount to 440 tons in the one case and 550 in the other. The average burden of boats engaged in Berlin traffic was 100 tons in 1884 and 124 tons in 1894. The sailboats and barges used on the Berlin waterways are provided with movable masts.

Until 1875 the City of Berlin was responsible for the maintenance of only 21 bridges, of which only one spanned the River Spree; the others being bridges over canals. In the year 1876, by agreement with the State, Berlin took over the jurisdiction and maintenance of 75 bridges, including 15 over the principal arm of the Spree. That is to say, in 1876 Berlin had 96 bridges, of which 22 (*viz.*, 17 over the Green Ditch and 5 over the King's Ditch) have since been done away, owing to the filling-up of the waters which they crossed. Deducting these 22 bridges from the 96, which the city was charged with in 1876, leaves 74. In the period 1876 to 1896 the city undertook the re-building of 38 bridges, at a total cost of 20,631,700 marks. Work was still in progress on twelve of these in 1896. In 1896 there were 90 street bridges belonging to the city within its limits; of these, 72 crossed navigable waters. Besides these 90 street bridges there were 13 railroad bridges, most of which crossed navigable waters.

Of the 75 bridges taken over from the State by Berlin in 1876, 35 were drawbridges. In 1896 the number of old drawbridges had

been reduced to 16, and no drawbridge of any importance has been built in the City of Berlin within the last twenty years.

The locks between the Upper and Lower Spree, at the so-called Milldam bridge, have been improved within the last ten years. The so-called Milldam lock is 110 meters by 9.60 meters. It admits of the passage of 250 boats every 16 hours. The longest bridge over the Spree is a drawless bridge, 149.20 meters in length, and comprises 7 spans. The middle span is 22 meters in width. The lower part of the Spree, within the most thickly settled portion of the city, is about 50 meters wide, and the distance between high water mark and the lower edge of the middle arch of most bridges is about 4 meters—3.14 meters being the minimum space allowed. At low water the Lower Spree is about 1½ meters in depth.

In 1895 the total water-borne freight in Berlin amounted to 5,604,000 tons in round numbers, which was 4,000 tons in excess of the 5,600,000 tons of freight brought to Berlin by the railroads.

In 1894 the water-borne building materials landed in Berlin amounted to 2,857,713 tons; grain, 355,720 tons; coal and coke, 611,115 tons; wood and lumber, 377,550 tons.

The following statistical statements are taken from "*Berlin und Seine Bauten*," Vol. I., published in 1896 for an association comprising the principal architects of Berlin.

Table showing the Amount of Traffic on the Waterways of Berlin, i. e., River Spree and Canals

LONDON.

The Thames Conservancy Board has charge of the whole area of the River Thames above the metropolis (i.e., westward of London Bridge), and to a limited extent below the metropolitan boundary. It levies tolls on barges and pleasure boats. Under the provisions of the Canals and Tolls Acts, C. 6, 1894, the charges upon barges are:

Up to Strand-on-Green or Kew ... 1½d. per ton of merchandise.
Richmond or Isleworth..... 2½d. per ton of merchandise.
Twickenham 3½d. per ton of merchandise.

In 1894, the tolls thus received were:

On barges£9,133 14s. 3d.
On pleasure boats 6,042 10s. 6d.

In 1895, the tolls thus received were:

On barges£8,655 15s. 4d.
On pleasure boats 6,802 07s. 11d.

The charges on pleasure boats are based upon measurement, and refer only to the tolls received for passage through locks.

Taking the above tolls into consideration, we may safely state that there could not have been, in 1894, less than 626,312 tons of merchandise carried above London Bridge by barges, and not less than 593,538 tons in 1895.

All the Thames traffic above London Bridge, which is the head of navigation for ocean-going vessels, passes under drawless bridges. The first lock on the river is at Isleworth. According to Baedeker's map of London (1896), there are 18 bridges without draws and none with a draw between London Bridge and Isleworth. The Tower Bridge, which is a drawbridge, is below London Bridge.

PARIS.

The course of the Seine in Paris, i.e., within the fortifications, measures 12.337 kilometers, or 7.604 English miles. In its course, the Seine is crossed at 23 places by 31 bridges.

The Port St. Nicholas, opposite the Louvre, is the principal seat of the sea-borne traffic. Ten bridges, all without draws, lie between the Port and the *Point-du-Jour*, where the Seine passes outside of Paris.

The Seine is connected by the St. Martin canal, 5 kilometers (3¼ English miles), with the Basin of La Villette; most of the canal is underground. In 1893, 6,673 vessels, with 973,383 tons of lading, passed through the Saint Martin canal, which is navigable for tugs and barges.

The canals admit of the passage of boats bearing 150 tons of cargo. The Seine admits of the passage of craft of 1,000 tons burden.

The Port of Paris, including the Canals of Saint Martin, St. Denis and L'Ourcq, is the most considerable in France as regards tonnage; e.g., there were entered and cleared in 1895, 6,937,714 tons in 37,573 vessels at Paris, while at Marseilles the tonnage of merchandise amounted to but 4,923,294 tons.

The breadth of the bed of the Seine, at low water, varies from 86 meters to 180 meters. The free space above high-water mark varies on the main stream from 4.45 meters in case of the *Pont de l'Alma* to 6.67 meters in case of the *Pont National*. — “*Atlas des Voies Navigables de La France*,” etc., 1896.

The following tables, relating to the traffic on the water-ways of Paris in the year 1896, are compiled from the “*Annuaire Statistique de la Ville de Paris. XVIIIE Année, 1896.*” Paris, 1898:

Passenger Traffic on the Seine, 1896

Compagnie des Bateaux-Parisiens

	The Seine	50.56%	61.75%
	Canals.....	49.44%	38.25%

STATISTICS RELATING TO MASSACHUSETTS CITIES.

The following table, designed to show the relation of the thirty-two cities of the Commonwealth with respect to population, assessed valuation, tax-rate and indebtedness, has been compiled from various sources.

Population. The figures for enumerated population in 1895 are from the State Census of 1895. The estimated population for 1898 is taken by permission from the advance sheets of the Report of the State Board of Health for 1898. The estimate is for the date June 30, 1898.

Assessed Valuation and Tax-Rate. These figures have been taken from the table of “Aggregates of Polls, Property, Taxes, etc., as assessed May 1, 1898,” published by the Secretary of the Commonwealth. (Public Document No. 19, 1899.)

Indebtedness. The amounts of gross debt and sinking funds have been taken from the “Report of the Tax Commissioner of the Commonwealth of Massachusetts for the year ending December 31, 1898 ” (Public Document No. 16, 1899), and represent the debt of each city as returned to the Tax Commissioner for the date of May 1, 1898. (See Table H of the document cited, pages 247 to 257.)

We have supplied the column of net debt, that is, gross debt less sinking funds, and have also added the percentage of net debt to the total assessed valuation and the amount of net debt per capita of the estimated population, June 30, 1898.

According to a statement furnished by the State Auditor, the net debt of the State, on January 1, 1898, amounted to \$12,462,378, whereas the net debt of the cities and towns of Massachusetts, taken together, on May 1, 1898, amounted to \$121,385,139.

For convenience of comparison we have have added the relative rank of each of the thirty-two cities with regard to each subject considered. These ranks run from 1 to 32, except in the cases of the columns showing “Tax-Rate per \$1,000 ” and “Sinking Funds,” which run from 1 to 25 and 1 to 27 respectively. Although 32 cities are included in the table, five of these had no sinking funds, leaving only 27 to be ranked. In the case of the tax-rate the 32 cities had only 25 different tax-rates, as follows :

1—\$21 80.....1 city	14—\$16 80..... 1 city
2— 20 20.... 1 “	15— 16 50..... 1 “
3— 19 20.....1 “	16— 16 40..... 1 “
4— 19 00.....1 “	17— 16 20..... 2 cities
5— 18 70.....1 “	18— 16 10..... 1 city
6— 18 60.....2 cities	19— 16 00..... 1 “
7— 18 10.....1 city	20— 15 60..... 1 “
8— 18 00.....2 cities	21— 15 50..... 1 “
9— 17 90.....1 city	22— 15 00..... 1 “
10— 17 80.....4 cities	23— 14 40..... 1 “
11— 17 60.....2 “	24— 13 80..... 1 “
12— 17 40.....1 city	25— 13 60..... 1 “
13— 17 00.....1 “	—

32 cities

Boston, with the largest population, valuation and net debt, has the lowest tax-rate ; having the largest net debt, it, nevertheless, has a smaller per capita net debt than Newton, and when the assessed valuation is considered there are twenty cities showing a larger percentage of net debt to the assessed valuation.

POPULATION, VALUATION, TAX-RATE AND INDEBTEDNESS OF THE CITIES OF MASSACHUSETTS IN 1898

APPENDIX.

EXPENDITURES OF THE FIRE DEPARTMENT.

The analysis of the expenditures of the Fire Department, given in "Special Publication No. 3" of the Statistics Department, shows a deficit of \$71,136.56 in 1896-97, and \$106,667.48 in 1897-98. This deficit was the result of an increase in the charge for the use of water at fires from \$2 per hydrant in previous years to \$20 per hydrant in these two years. The result was a charge against the Fire Department of \$99,643 in 1896-97 and \$106,695 in 1897-98. No provision was made for meeting these charges from the annual appropriation, hence the apparent deficit. Had the charges not been made there would have been a real surplus of \$15,000 in 1896-97, and of \$27.52 in 1897-98.

The extra charge for water was made in order to show the real value of the water works to the city in view of the sale of a portion of the works to the Commonwealth. The transaction was purely a matter of book-keeping, and represented no actual expenditure of money or real income to the city. The bills were met by a transfer from the surplus revenue credited to the Fire Department; on payment, this was credited to the Water Department, whence it found its way back into the surplus revenue of the city as surplus revenue of that department. In 1896-97, beside the surplus shown above, the Fire Department paid from its regular appropriation \$13,506.44 of these water bills.

THE DEBT OF BOSTON, 1878-98.

The indebtedness of the City of Boston naturally divides itself into four parts, namely: the City Debt (properly so called), the County Debt, the Cochituate Water Debt and the Mystic Water Debt. The City Debt includes all bonds issued by the City of Boston for general municipal purposes not included in the other three classes of debt. The County Debt includes all bonds issued by the County of Suffolk for county purposes. This debt originated in 1885, and is now composed entirely of bonds issued to pay for the construction of the Suffolk County Court House in Pemberton square. The Cochituate Water Debt originated in 1846 in the construction of the Boston water works at Lake Cochituate. The extension of these works into the Sudbury river basin has increased the debt in more recent years. The water works (except the system of distributing mains within the city limits) were transferred to the Commonwealth January 1, 1898. The sum of \$5,000,000, paid to the city on account of this purchase, has been formed into a fund, the interest of which may be used to make good any deficit in the Water Department, the capital, with accumulations of unused interest, to be applied in meeting the Cochituate water bonds at maturity. This fund, since it is not a sinking fund in the strict sense of the term, has not been included in the Cochituate Water Sinking Fund for 1898-99. Had this been done the net liability of the city on this account would have been reduced from \$7,634,154.10 to \$2,634,154.10. The Mystic Water Debt originated in 1874. It consisted of \$1,280,000, which was the amount of bonds (then remaining unpaid) issued by the City of Charlestown on account of the construction of the water works to supply that city. When Charlestown was annexed to Boston, January 5, 1874, the City of Boston assumed this debt. The funded debt was finally extinguished in 1894-95, although a small amount was borrowed temporarily in 1895-96 and repaid within the year. For three years before the final extinguishment of the debt the Mystic Water Sinking Fund showed a surplus of assets over liabilities. This surplus was

consolidated with other funds in the hands of the Sinking Funds Commissioners after the extinguishment of the Mystic Water Debt.

These tables show in the first two columns the annual charge on account of debt, including the amount paid to the Commissioners of Sinking Funds, and separately the amount paid for interest. The next three columns show the movement of the debt during the year, namely, the debt created, debt paid and the resultant increase or decrease. The last three columns show the status of the debt at the end of the fiscal year, namely, the gross debt at the end of the year, the sinking funds at the same date, and the amount of gross debt less sinking funds. The amounts given in this last column will not agree with the net debt as shown by the City Auditor, for the reason that his figure for the net debt is obtained by deducting not only the sinking funds, but also the credit balance of the betterment account and sums held by the Treasurer to pay debt matured but not presented for payment.

Certain debt issued in recent years and included in the City Debt differs from the other City Debt by not being a charge upon the tax levy for interest payments. The interest is paid from receipts of various sorts. The debt issued is as follows:

(1.) For laying-out and construction of highways —			
1891-92.....	\$50,000	1896-97	\$1,200,000
1892-93.....	450,000	1897-98	900,000

1896-97.....	2,000,000	Total.....	\$4,700,000
1897-98.....	1,200,000	Grand total,	13,011,650

The receipts from work undertaken under the acts authorizing loans for the "Laying-out and Construction of Highways," and for "Rapid Transit," are applied to the payment of interest on these loans respectively, and the balance, if any, is paid to the Sinking Fund Commissioners. The following amounts have been paid for interest, or credited to the Sinking Fund Commissioners:

	Amount Paid Sinking Funds.	Amount Paid for Interest.
1891-92.....	\$1,000 00
1892-93.....	\$39,308 27	2,777 40
1893-94.....	80,297 30	23,381 42
1894-95.....	59,823 33	47,746 06
1895-96.....	118,170 09	112,108 00
1896-97.....	79,430 68	209,800 19
1897-98.....	37,648 23	267,796 97
1898-99.....	42,779 67	327,507 72

In making up the following tables, these amounts have been included in the Summary Table (debt of all kinds), but omitted from the table showing the City Debt. This was done in order to show under the latter the "City Debt Requirements," that is, the amount of interest and sinking-fund payments met from the tax levy. To obtain the total payments for interest and to the Sinking Fund Commissioners on account of the principal of the City Debt, the above amounts should be added in the respective years to the totals, as shown in the table, City Debt.

DEBT OF BOSTON, 1878-98.

1. Summary — Debt of All Kinds.

FINANCIAL YEAR.	Amount paid to Sinking Funds.	Amount paid for Interest.	Debt Created.	Debt Paid.	Net Increase.	Gross Debt, end of Year.	Sinking Funds, end of Year.	Gross Debt less Sinking Funds.

APPENDIX.

REAL ESTATE EXEMPTED FROM TAXATION, 1898.

Vol. I., No. 7, of the BULLETIN contained tables, giving the amount and value of land taxed and the number of buildings taxed, as of May 1, 1898. In order to make the latter presentation more useful we append in the present number a table showing the total number of buildings taxed, the assessed valuation of the same, and the average assessed valuation of buildings by wards.

WARDS	Total Buildings Taxed	Total Value	Average Valuation
1.....	3,187	\$6,797,800	\$2,138
2.....	2,657	6,373,000	2,399
3.....	1,827	3,998,700	2,189
4.....	2,292	4,669,200	2,037
5.....	1,461	5,282,600	3,616
6.....	2,850	32,532,700	11,415
7.....	2,785	51,000,800	18,312
8.....	2,080	10,746,300	5,166
9.....	2,069	13,139,900	6,351
10.....	2,302	21,495,000	9,338
11.....	3,180	43,068,600	13,544
12.....	2,338	14,253,800	6,097
13.....	2,570	7,848,400	3,054
14.....	2,749	6,624,700	2,409
15.....	2,582	5,584,300	2,168
16.....	2,625	8,490,500	3,234
17.....	2,733	9,523,500	3,485
18.....	2,674	8,020,900	3,000
19.....	2,692	9,302,200	3,455
20.....	4,778	17,027,600	3,564
21.....	3,253	15,186,400	4,668
22.....	3,125	11,744,500	3,758
23.....	3,846	9,943,800	2,585
24.....	4,897	14,849,600	3,082
25.....	4,079	9,982,100	2,447
Totals	71,631	\$347,486,900	\$4,851

The preceding number of the BULLETIN contains a table showing the assessed valuation of the real estate exempted from taxation by wards. The footings of this table give the total assessed valuation of exempted real estate as \$164,126,900, of which \$108,857,650 is land and \$55,269,250 is buildings. The total number of feet of land exempted is there given as 242,770,731 square feet. Further examination of the detail of the Assessors' figures has resulted in the discovery of various small errors in computation, the net result of which was the omission of 9,012 square feet of land, making the corrected total 242,779,743, which is used in the following tables. The errors referred to were in no case large enough to affect the figures showing the average assessed valuation of the land per square foot, as given in the table previously published.

The following tables give an analysis of the exempted property by classes of property. The chief classes of property are: (1) the property of the United States of America, (2) the property of the

Commonwealth of Massachusetts, (3) the property of the City of Boston, (4) the property of churches, (5) the property of charitable, benevolent, literary, scientific and educational institutions, (6) other exempted property.

Table 1 is a summary table, showing the total amount of exempt property in each of these six classes, and the total amount for all classes, which agrees with the totals given in the table presenting an analysis by wards, which appeared in the Appendix to Vol. I., No. 7, of this BULLETIN, except as to the number of square feet of land, as explained above.

1. Exempt Property — Summary

CLASS OF PROPERTY EXEMPT	REAL ESTATE			
	ASSESSED VALUATION			Estimated Square Feet of Land

Table 6 contains property not included under the preceding heads. The chief item is the value of cemeteries owned by private corporations. Cemeteries owned by the City of Boston are included under city property, and are shown in detail in a separate table. A small amount of property of Grand Army associations and property of widows and minors is here included.

Table 8k shows the assessed valuation of the parks and public grounds. This table is incomplete because of omissions on the part of the Assessors. In Wards 11 and 19 over 8,000,000 feet of land are entered upon the street books as belonging to the park-way and other public grounds, but no valuation is placed upon them. In some wards the public squares are wholly omitted, as in Ward 12, where Blackstone and Franklin squares and various other smaller public grounds are omitted. The figures given here are not to be relied on except as giving the total valuation of land designated as Public Parks and Public Grounds on the books of the Assessors. Boston Common, in Ward 7, is valued at \$33,536,-300, and the Public Garden, in Ward 11, at \$12,724,800.

8k. Parks and Public Grounds

* Feet of land not valued by the Assessors.

Table 8m shows the assessed valuation of land and buildings not included elsewhere. In general it includes property owned by the city, but not at present in use for city purposes, the entrances to the subway, islands in the harbor not included under institutions, and the gravel lots and wharves belonging to the Street Department. The large amounts in Wards 6 and 7 are due to the value of entrances to the subway.

MUNICIPAL REVENUE FROM MARKETS.

The following, regarding the revenue derived by cities in the United States from markets, is taken from an article on "Municipal Functions," by Milo R. Maltbie, published in "Municipal Affairs" for December, 1898.

In the United States the market system rests for the most part on an entirely different basis from that in all European countries. While municipal authorities generally have the power to establish markets, the monopoly privilege is not often found. There are frequently also market halls under private management.

The municipal markets in the United States are, however, neither few nor insignificant. The largest are those of New York city, which yield a gross revenue of nearly \$300,000. Considering the size of the city, those of New Orleans are the most important; the principal ones being leased for \$186,000 a year, and an addi-

tional \$40,000 which the city must use for repairs to the buildings. The municipality also operates directly four markets, which yield a revenue of \$10,000 a year. In this instance the city possesses a market monopoly, and the few private enterprises are carried on under the right of reversion to the city. The Quincy Market of Boston is valued at \$1,250,000, and produces an annual revenue of \$72,000, of which \$60,000 is net profit. Baltimore has a revenue of \$48,000 from markets, and St. Louis of \$28,000. The municipal market buildings of Pittsburg are valued at \$350,000, those of St. Paul at \$250,000, and those of Philadelphia, Cincinnati, Nashville, Mobile and Savannah at over \$100,000 each. Three-fourths of the cities with 100,000 population have municipal markets, the exceptions being San Francisco, Minneapolis, Jersey City, Louisville, Rochester and Providence. Chicago, Omaha and Albany have no market buildings, but have public market-places. Of cities with from 25,000 to 100,000 population, about one-third have municipal markets, and in nearly every case this means the possession of a market hall, in which stalls are rented to the dealers.

In the countries to the south of the United States, municipal markets are almost as general a function as in continental Europe. In not a few cases valuable buildings have been erected by the municipalities. The one at Puebla is valued at \$500,000, and the city's revenue from markets is \$30,000 a year. The municipal markets of San Luis Potosi, Mexico, are valued at \$800,000, and those of Rosario, Argentine, at \$250,000. Municipal markets are also a regular feature in the Canadian cities. The municipality of Montreal owns all (13) in the city. The market buildings of Toronto are valued at \$340,000.

NOTE.

As the BULLETIN is sent to many officials and institutions in other cities and countries the following statement is introduced in explanation of the nature and source of the data contained in the tables referred to.

Table IV. is compiled from returns made by the Cemetery Department.

Table V. The Massachusetts Cremation Society is a private organization, to which the only crematory in Boston belongs.

Table IX. (1) The Brighton Abattoir is the only authorized abattoir within the city limits. It belongs to a private company, but is subject to the oversight and regulation of the Health Department of the city, in accordance with Chapter 144 of the Acts of the Legislature of 1876. (2) The Health Department derives its authority to order houses which it deems unfit for human habitation to be vacated or demolished from Chapter 219, Acts of 1897, and Chapter 222, Acts of 1899. (3) The Public Statutes (Chapters 57 and 60) require the mayor and aldermen of cities, and permit the selectmen of towns, to appoint inspectors of milk and inspectors of vinegar, and prescribe regulations relating to the storage and sale of milk and vinegar. By special acts of the Legislature (see Chapter 313, Acts of 1893, and Chapter 449, Acts of 1895) the appointment of milk inspectors in Boston is vested in the Boston Board of Health.

Table XII. Number of pupils means whole number of pupils belonging, *i. e.*, enrolled on the dates specified, as returned to the Superintendent of Schools.

Table XV. is compiled from the reports made by the Real Estate Exchange and Auction Board of transfers and mortgages of real estate recorded at the Suffolk Registry of Deeds.

Table XVI. is compiled from data furnished the Statistics Department by the Collector of Customs of the port of Boston.

Table XVIII. is compiled from data furnished by the curator of the Museum of Fine Arts, which is a private institution.

APPENDIX.

COMPARISON OF FIRE AND POLICE STATISTICS OF PRINCIPAL AMERICAN CITIES.

The *Bulletin* of the Department of Labor, No. 24, Washington, D.C., September, 1899, contains an article entitled "Statistics of Cities," which is mainly made up of tables as follows:

- Table I.—Population, area, period covered, etc.
- Table II.—Police, retail liquor saloons, and arrests and convictions, by causes.
- Table III.—Firemen, fire equipment, and property loss from fires.
- Table IV.—Deaths by causes, sanitary inspection, etc.
- Table V.—Percentage of deaths from each specified cause of total deaths.
- Table VI.—Death rate per 1,000 population.
- Table VII.—Area of streets paved, by kind of pavement.
- Table VIII.—Care of streets, disposal of garbage, and area of public parks.
- Table IX.—City almshouses, orphan asylums, and hospitals.
- Table X.—City schools and libraries.
- Table XI.—Cost of water, gas, and electric-light works, owned and operated by cities.
- Table XII.—Debt, assessed valuation of property, and taxation.
- Table XIII.—Income from all sources.
- Table XIV.—Expenditures for construction and other capital outlay.
- Table XV.—Expenditures for maintenance and operation.
- Table XVI.—Summary of income and expenditure, and assets.
- Table XVII.—Per capita debt, assessed valuation of property, and expenditures for maintenance.

These tables, which relate to 140 cities of the United States, were compiled by the United States Commissioner of Labor, under an Act of Congress of July 1, 1898, authorizing the annual publication of "an abstract of the main features of the official statistics of the cities of the United States having over 30,000 population." The facts presented cover the last fiscal year for which reports were available.

The tables based upon estimated population on January 1, 1899, e.g., Tables I, VI. and XVII., by reason of the doubt attaching to some of the estimates of population, must be taken with a considerable degree of allowance.

The following table, compiled from the article in question, shows the estimated population on January 1, 1899, and the area in acres of the ten most populous cities of the United States:

	Population.	Area in Acres.
1. New York.....	3,500,000	196,900
2. Chicago.....	1,850,000	119,869
3. Philadelphia.....	1,240,266	82,933
4. St. Louis.....	623,000	40,000
5. Boston.....	582,463	27,596
6. Baltimore.....	541,000	24,171
7. Cincinnati.....	415,000	20,860
8. Buffalo.....	400,000	25,343
9. Cleveland.....	380,000	20,352
10. San Francisco.....	360,000	27,000

Fire Department Statistics, 1898

CITIES	Cost of Maintenance and Operation	Firemen	Steam Engines	Chemical Engines	Fire Hydrants	Fire Alarms	Fires	Property Loss
New York.....	—	45,746	145	6	20,130	7,100	6,472	\$5,100,000
Chicago.....	\$1,554,065	21,175	92	25	18,311	6,581	5,048	2,651,735
Philadelphia...	1,004,169	736	46	5	11,000	2,586	2,484	1,653,902

Baltimore.....	844,576	850	31,897	9,681	5,245	32	189	2,402
Cincinnati.....	559,965	530	12,715	2,124	1,295	23	16	772
Buffalo.....	762,958	665	24,489	9,619	4,784	10	332	1,651
Cleveland.....	385,716	345	14,452	7,685	767	5	121	926
San Francisco..	817,309	557	28,013	12,390	2,009	48	309	984

* Not including data relating to sanitary district of Chicago.
† Included under arrests for drunkenness.
‡ Not reported, because of reorganization of the city.

NOTE.

As the BULLETIN is sent to many officials and institutions in other cities and countries the following statement is introduced in explanation of the nature and source of the data contained in the tables referred to.

Table IV. is compiled from returns made by the Cemetery Department.

Table V. The Massachusetts Cremation Society is a private organization, to which the only crematory in Boston belongs.

Table IX. (1) The Brighton Abattoir is the only authorized abattoir within the city limits. It belongs to a private company, but is subject to the oversight and regulation of the Health Department of the city, in accordance with Chapter 144 of the Acts of the Legislature of 1870. (2) The Health Department derives its authority to order houses which it deems unfit for human habitation to be vacated or demolished from Chapter 219, Acts of 1897, and Chapter 222, Acts of 1899. (3) The Public Statutes (Chapters 57 and 60) require the mayor and aldermen of cities, and permit the selectmen of towns, to appoint inspectors of milk and inspectors of vinegar, and prescribe regulations relating to the storage and sale of milk and vinegar. By special acts of the Legislature (see Chapter 313, Acts of 1893, and Chapter 449, Acts of 1895) the appointment of milk inspectors in Boston is vested in the Boston Board of Health.

Table XII. Number of pupils means whole number of pupils belonging, i. e., enrolled on the dates specified, as returned to the Superintendent of Schools.

Table XV. is compiled from the reports made by the Real Estate Exchange and Auction Board of transfers and mortgages of real estate recorded at the Suffolk Registry of Deeds.

Table XVI. is compiled from data furnished the Statistical Department by the Collector of Customs of the port of Boston.

Table XVIII. is compiled from data furnished by the curator of the Museum of Fine Arts, which is a private institution.

* This table is taken from the "Census of the Commonwealth of Massachusetts, 1896. Population and Social Statistics, Part 3, Vol. 1." — Boston, 1896.

NOTE. — As the BULLETIN is sent to many officials and institutions in other cities and countries the following statement is introduced in explanation of the nature and source of the data contained in the tables referred to.

Table IV. Is compiled from returns made by the Cemetery Department. — Table V. The Massachusetts Cremation Society is a private organization, to which the only crematory in Boston belongs. — Table IX. (1) The Brighton Abattoir is the only authorized abattoir within the city limits. It belongs to a private company, but is subject to the oversight and regulation of the Health Department of the city. In accordance with Chapter 144 of the Acts of the Legislature of 1876. (2) The Health Department derives its authority to order houses which it deems unfit for human habitation to be vacated or demolished from Chapter 319, Acts of 1897, and Chapter 222, Acts of 1899. (3) The Public Statutes (Chapters 57 and 60) require the mayor and aldermen of cities, to appoint inspectors of towns, to appoint inspectors of milk and inspectors of vinegar, and prescribe regulations relating to the storage and sale of milk and vinegar. By special acts of the Legislature (see Chapter 318, Acts of 1888, and Chapter 449, Acts of 1886) the appointment of milk inspectors in Boston is vested in the Boston Board of Health. — Table XII. Number of pupils means whole number of pupils belonging, i. e., enrolled on the dates specified, as returned to the Superintendent of Schools. — Table XV. Is compiled from the reports made by the Real Estate Exchange and Auction Board of transfers and mortgages of real estate recorded at the Suffolk Registry of Deeds. — Table XVI. Is compiled from data furnished the Statistics Department by the Collector of Customs of the port of Boston. — Table XVIII. Is compiled from data furnished by the curator of the Museum of Fine Arts, which is a private institution.

CITY OF BOSTON

MONTHLY BULLETIN

OF THE

STATISTICS DEPARTMENT

NOVEMBER, 1899

Volume I — No. 11

BOSTON
MUNICIPAL PRINTING OFFICE
1900

TABLE OF CONTENTS.

	PAGE
I. Meteorological Observations:	
October	3
II. Movement of Population:	
1. Weekly Mortality	4
2. Monthly Mortality	5
3. Principal Causes of Death	6
III. Burial Permits issued by the Board of Health	7
IV. Interments in City Cemeteries.	8
V. Cremations at Forest Hills	8
VI. Movement of Institutions Population:	
1. Pauper Institutions	9
2. Penal Institutions	10
3. Children's Institutions — A	11
4. Children's Institutions — B	12
5. Insane Institutions	13
VII. Immigration Statistics	13
VIII. Fire Department	14
IX. Health Department:	
1. Bureau of Cattle Inspection	15
2. Houses Ordered Vacated or Demolished	15
3. Bureau of Milk Inspection	16
X. Library Department	16
XI. Police Department:	
1. Arrests	17
2. General Work	17
XII. Public Schools:	
1. Number of Pupils	18
2. Pupils in High and Latin Schools	18
XIII. Employment Certificates	19
XIV. Public Baths	19
XV. Statistics Relating to Real Estate	19
XVI. Commercial Statistics, Port of Boston:	
1. Number and Tonnage of Vessels	20
2. Value of Imports and Exports — Pas- sengers Arrived	20
XVII. Statistics Relating to Flour Supply.	21
XVIII. Museum of Fine Arts — Number of Admissions	21

APPENDIX.

Political Condition, by Sex and Ward, of Popula- tion of Boston, 1895	22
Note	22

APPENDIX.

FOREIGN COMMERCE OF THE PRINCIPAL PORTS OF THE UNITED STATES, 1890-99.

The following tables, compiled from the reports on the "Commerce and Navigation of the United States," published by the United States Treasury Department, are designed to show the position of Boston with regard to the foreign commerce of the United States during the ten years ending June 30, 1899. New York is by far the chief port of the United States, particularly with regard to the value of its imports. In each of the years 1890-1899 Boston stood second to New York with regard to the value of total exports and imports of merchandise. In respect to imports Boston was second only to New York throughout the decade, excepting the year 1894, when the imports at Philadelphia exceeded in value the imports at Boston by the sum of \$3,417,632. The excess in value of Boston's imports over those of Philadelphia for the ten years amounted to \$168,778,394.

The total export trade of Boston was less by \$27,144,703 than that of New Orleans for the ten years' period; although for the five years 1895-1899 the excess of exports from Boston over exports from New Orleans amounted to \$75,878,701 in value. In respect to exports, New Orleans led Boston in the years 1890, 1891, 1892 and 1897. Baltimore also led Boston as regards value of exports in the years 1890, 1892 and 1898, although the total value of Boston's exports for the decade was \$105,405,448 greater than that of Baltimore's exports for the same period.

In the tables on page 23 we give the value of the total trade, imports and exports of the United States and of each of the five principal ports, New York, Boston, New Orleans, Philadelphia and Baltimore. In addition to the absolute values, the percentage which the commerce of each port bears to the total commerce of the United States is given. For convenience these percentages have been grouped by themselves—see summary table below. The results show that the aggregate commerce of these five ports forms a diminishing proportion of the total commerce of the United States, or, in other words, that other smaller ports must be obtaining an increasing share. In point of fact, the trade of Galveston, Newport News, Savannah and San Francisco has greatly increased, especially as regards exports, during the past ten years. As regards the comparative standing of the five principal ports, New York, New Orleans and Philadelphia have lost ground, while Boston and Baltimore have gained, especially in the last five years.

Trade of the Principal Ports in Per Cent. of the Commerce of the United States.

On page 24 we present a series of tables showing the value of the total trade, of imports and of exports of the United States and of Boston and the percentage of increase or decrease of the commerce of each year over that of the preceding year. These percentages have been consolidated into a single table which appears below. They show that the rate of growth of the commerce of Boston compares favorably with that of the United States. During the ten years 1890-1899 Boston more than held its own as the second commercial port of the country.

The annual value of Boston's total trade in the period, 1890-99, ranged between \$134,078,610 in 1890 and \$191,035,700 in 1897, the average for the ten years being \$160,797,029. The corresponding figures for imports and exports for Boston are as follows: Imports, least in 1894, valued at \$50,309,331; greatest in 1897, valued at \$90,178,419; average annual value, \$67,535,721. Exports, least in 1890, valued at \$71,201,944; greatest in 1899, valued at \$128,037,149; average annual value, \$93,261,308.

The largest per cent. of increase in the trade of Boston in any one year was 14.85, in 1896; the largest decrease being 22.74 per cent. in 1894. In respect to imports the largest increase was 32.96 per cent. in 1895, and the largest decrease was 42.92 per cent. in 1898; while as regards exports, the largest increase amounted to 16.53 per cent. in 1898, and the largest decrease to 1.97 per cent. in 1893.

Per Cent. of Change Over Previous Year

CITY OF BOSTON

MONTHLY BULLETIN

OF THE

STATISTICS DEPARTMENT

DECEMBER, 1899

Volume I — No. 12

Contents: Tables I.-XVIII.; Appendix; Election Statistics, 1890-99; Expenditures of Public Institutions, 1894-99; Summary Tables, 1899

BOSTON
MUNICIPAL PRINTING OFFICE
1900

ties of Boston. The table shows the percentage relations of voters registered for the State and Municipal elections, and of the votes cast for Governor and Mayor in the years in question, to ratable polls and to legal voters. It will be seen that the per cent. of actual voters to ratable polls, to legal voters, and to registered voters in 1895, considerably exceeded the mean for the years 1875, 1885 and 1895.

YEAR	1875	1885	1895	1875-95
<i>Per Cent. of Ratable Polls who were:</i>				
(1) Legal Voters.....	72.04	76.88	72.65	73.83
(2) Registered Voters at State Election.....	40.96	48.76	56.09	49.84
" " " Municipal Election	41.70	50.35	58.61	51.61
(3) Actual Voters for Governor.....	28.66	35.67	42.87	36.90
" " " Mayor.....	28.38	38.24	49.15	40.31
<i>Per Cent. of Legal Voters who:</i>				
(1) Were Registered at State Election.....	56.87	63.43	77.21	67.51
" " " Municipal Election..	57.89	65.49	80.68	69.90
(2) Voted for Governor.....	39.79	46.40	59.02	49.99

<i>Per Cent. of Actual Voters :</i>				
(1) Who Voted for Governor to Ratable Polls,	28.66	35.67	42.87	36.90
" " " Mayor to Ratable Polls ..	28.38	38.24	49.15	40.31
(2) Who Voted for Governor to Legal Voters,	39.79	46.40	59.02	49.99
" " " Mayor to Legal Voters...	39.41	49.74	67.66	54.59
(3) Who Voted for Gov'r to Regist'd Voters,	69.96	73.15	78.43	74.03
" " " Mayorto " "	68.05	75.95	83.88	78.10

During the decade, 1890-99, eight questions were referred to the people of Boston by the State Legislature. The per cent. of registered voters who voted on these questions is shown by wards, and for the city in Table XI. The same percentages are shown for the city in the following table, together with the per cent. of assessed polls who voted on referendum questions. It may be added that in 1895 the per cent. of legal voters (males) who voted on the referendum of that year was 57.23 against 59.02 per cent. who voted for Governor, and 67.66 per cent. who voted for Mayor.

Comparison of the middle column of per cents. in the following table (which are also given in the last line of Table XI.) with the figures in Table I. — which show the per cent. of actual voters to registered voters at the State and Municipal elections — leads to the conclusion that comparatively few voters take the trouble to vote on referendum questions. Thus the largest vote in ten years on a referendum was 75.63 per cent. of the registration for the City election in 1899, on the question of replacing the electric railway tracks on Tremont street, or .09 per cent. less than the mean per cent., for ten years, of the registered voters who voted for Governor. In 1895 only 63.34 per cent. of the registered male voters and 59.08 per cent. of the registered female voters voted on the question of granting municipal suffrage to women. The total number of men who voted amounted to 57.23 per cent. of the legal voters, while that of the women may be safely estimated as amounting to less than 10 per cent. of the women entitled to be registered.

YEAR	QUESTION SUBMITTED	PER CENT. OF		
		Assessed Polls who were Registered	Registered Voters who Voted	Assessed Polls who Voted
1893..	Election of 12 Aldermen-at-large....	60.94	53.32	32.49
1893..	Provision of Rapid Transi.....	60.94	59.07	37.00

1897..	Consolidation of Aldermen and Common Council.....	59.91	59.00	35.35
1899..	On re-laying of tracks on Tremont street.....	61.66	75.63	46.03
1899..	Acceptance of 8-hour law	61.66	73.21	45.14
*Men.		† Women.		

It is evident from inspection of the tables thus far analyzed that the voters of Boston show most interest in the election of President, and are more interested in the election of Mayor than in the election of Governor, or the question of License, or in referendum questions, yet the mean per cent. of those who voted for Mayor in 1875, 1885 and 1895 amounted only to 78.10 per cent. of the registered voters, 54.59 per cent. of the legal voters, and 40.31 per cent. of the polls in those years. The scope of the present study forbids the attempt to determine the strength of the voting habit in Boston as compared with other cities in the Commonwealth or elsewhere; but it may be said that our survey of the election statistics of Boston for the period, 1890-99, does not afford evidence opposed to the contention made by the Hon. Carroll D. Wright, when chief of the Bureau of Labor Statistics (see his reports of 1882 and 1888), that the proportion of actual to possible voters in Massachusetts and in Massachusetts cities, including Boston, is smaller than in some other parts of the country, *e. g.*, the other New England states, excepting Rhode Island, and in Indiana, New York, Pennsylvania and Ohio.

In 1891 the payment of a poll-tax as a prerequisite to voting was abolished by amendment of the Constitution. In 1891 the per cent. of assessed polls who registered for the Municipal election was 54.74. It rose to 60.79 per cent. in 1892, since when it has fluctuated between 61.09 in 1898 and 63.28 in 1897. Similarly, the per cent. of votes cast to assessed polls, which rose from 41.85 in 1891 to 47.74 in 1892, has uniformly exceeded 47.74 per cent., excepting in the years 1896 and 1898, in which years no election for Mayor occurred.

Baltimore and Boston are very nearly equal in respect to total population, but the following tables, which we have compiled from officially authenticated data, indicate that the citizens of Baltimore both register and vote in larger numbers than do the citizens of Boston. Thus out of 115,918 legal voters in Baltimore in 1895, 114,433, or 98.72 per cent. were registered; and 109,978, or 87.11 per cent., voted for Governor, while 100,692, or 86.86 per cent., voted for Mayor at the election in that year — State and City elections being held on the same day. The corresponding figures for Boston are: Legal voters, 113,393; registered, for State election, 87,533, or 77.21 per cent., and for City election, 91,483, or 80.68 per cent.; voted for Governor, 66,919, or 59.02 per cent., and for Mayor, 76,721, or 67.66 per cent.

NOTE. — As the BULLETIN is sent to many officials and institutions in other cities and countries the following statement is introduced in explanation of the nature and source of the data contained in the tables referred to.

Table IV. is compiled from returns made by the Cemetery Department. — Table V. The Massachusetts Cremation Society is a private organization to which the only crematory in Boston belongs. — Table IX. (1) The Brighton Abattoir is the only authorized abattoir within the city limits. It belongs to a private company, but is subject to the oversight and regulation of the Health Department of the city, in accordance with Chapter 144 of the Acts of the Legislature of 1876. (2) The Health Department derives its authority to order houses which it deems unfit for human habitation to be vacated or demolished from Chapter 219, Acts of 1897, and Chapter 222, Acts of 1899. (3) The Public Statutes (Chapters 57 and 60) require the mayor and aldermen of cities, and permit the selectmen of towns, to appoint inspectors of milk and inspectors of vinegar, and prescribe regulations relating to the storage and sale of milk and vinegar. By special acts of the Legislature (see Chapter 313, Acts of 1893, and Chapter 449, Acts of 1896) the appointment of milk inspectors in Boston is vested in the Boston Board of Health. — Table XII. Number of pupils means whole number of pupils belonging, *i. e.*, enrolled on the dates specified, as returns to the Superintendent of Schools. — Table XV. is compiled from the reports made by the Real Estate Exchange and Auction Board of transfers and mortgages of real estate recorded at the Suffolk Registry of Deeds. — Table XVI. is compiled from data furnished the Statistics Department by the Collector of Customs of the port of Boston. — Table XVIII. is compiled from data furnished by the curator of the Museum of Fine Arts, which is a private institution.

APPENDIX.

TAX-RATE, VALUATION AND INDEBTEDNESS OF MASSACHUSETTS CITIES, 1899, 1898

The following table, designed to show the relation to each other of the thirty-two cities of the Commonwealth with respect to population, assessed valuation, tax-rate and indebtedness, in the year 1899, has been compiled from various sources.

Population. The figures for enumerated population in 1895 are from the State Census of 1895. The estimated population for 1899 is taken by permission from advance sheets of the Report of the State Board of Health for 1899. The estimate is for the date June 30, 1899.

Assessed Valuation and Tax-Rate. These figures have been taken from the "Aggregates of Polls, Property, Taxes, etc., as assessed May 1, 1899," published by the Secretary of the Commonwealth. (Public Document No. 19, 1900.)

Indebtedness. The amounts of gross debt and sinking-funds have been taken from the "Report of the Tax Commissioner of the Commonwealth of Massachusetts for the year ending December 31, 1899" (Public Document No. 16, 1900), and represent the debt of each city as returned to the Tax Commissioner for the date of May 1, 1899. (See Table H of the document cited, page 262 to 272.

We have supplied the column showing net debt, that is, gross debt less sinking-funds, and have also added the percentage of net debt to the total assessed valuation and the amount of net debt per capita of the estimated population on June 30, 1899.

According to a statement furnished by the State Auditor, the net debt of the State, on January 1, 1899, amounted to \$14,898,964.24, whereas the net debt of the cities and towns of Massachusetts, taken together, on May 1, 1899, amounted to \$128,051,487.

For convenience of comparison we have added the relative rank of each of the thirty-two cities with regard to each subject considered. These ranks run from 1 to 32, except in the cases of the columns showing the "Tax-Rate per \$1,000," "Sinking-Funds" and "Per Cent. of Net Debt to Valuation," which run from 1 to 23, 1 to 27, and 1 to 30 respectively. Although 32 cities are included in the table, five of them had no sinking-funds, leaving only 27 to be ranked. In the case of the per cent. of net debt to valuation, the 32 cities had only 30 different per cents. In the case of the tax-rate the 32 cities had only 23 different tax-rates, as follows:

1—\$21 60.....1 city	13—\$16 90.....1 city
2— 19 60.....1 "	14— 16 50.1 "
3— 19 50.....1 "	15— 16 40.....1 "
4— 19 20.....3 cities	16— 16 30.....1 "
5— 19 10.....1 city	17— 16 00.....3 cities
6— 18 50.....1 "	18— 15 60.....1 city
7— 18 00.....3 cities	19— 15 50.....1 "
8— 17 80.....3 "	20— 15 40.....1 "
9— 17 60.....1 city	21— 15 20.....1 "
10— 17 40.....2 cities	22— 13 60.....1 "
11— 17 10.....1 city	23— 13 10.....1 "
12— 17 00.....1 "	
	32 cities

Boston, with the largest population, valuation and net debt, has the lowest tax-rate (as was the case in 1898); having the largest net debt, it, nevertheless, has a smaller per capita debt than Newton by \$56.85 — and when the assessed valuation is considered there are seventeen cities in the State having a larger percentage of net debt to assessed valuation.

To facilitate comparison of the table for 1899 with that for 1898 we republish the latter from the first issue of this Bulletin. The following table shows the tax-rate per \$1,000, and relative rank as regards the same in 1899, also the change in tax-rate from 1898 for the 32 cities of the Commonwealth:

CITY	Tax-Rate, 1899	Relative Rank	Change in Tax-Rate, from 1898	CITY	Tax-Rate, 1899	Relative Rank	Change in Tax-Rate, from 1898

BOSTON SCHOOL CENSUS.

Below are given the results of the last annual School Census, which was made in September, 1899, under the direction of the School Committee of Boston.

The following table shows the number of persons, between the ages of 5 and 15, in Boston, on September 1, 1899, who were (1) attending a public school, (2) attending a private school, (3) not attending any school:

WARD	Number in Public Schools	Number in Private Schools	Number Not at School	Totals
1.....	2,753	1,169	408	4,325
2.....	1,907	1,721	152	3,780
3.....	2,248	104	46	2,398
4.....	1,478	721	51	2,250
5.....	1,579	60	68	1,702
6.....	3,884	980	589	5,353
7.....	1,380	193	41	1,614
8.....	4,504	178	343	5,025
9.....	2,810	123	87	3,020
10.....	1,414	51	59	1,524
11.....	849	342	68	1,259
12.....	1,485	857	81	1,923
13.....	3,023	1,181	423	4,627
14.....	2,988	335	502	3,825
15.....	2,808	728	222	3,758
16.....	2,636	475	192	3,308
17.....	3,070	606	729	4,405
18.....	3,102	337	360	3,799
19.....	2,686	1,682	521	4,889
20.....	4,090	450	271	4,811
21.....	2,158	562	153	2,873
22.....	3,331	621	529	4,481
23.....	3,552	460	456	4,468
24.....	3,942	94	241	4,277
25.....	2,535	35	237	2,807
Totals.....	66,221	13,515	6,769	86,505

The following table shows the total number of persons, between the ages of 5 and 15, in the city of Boston, by Wards, on May 1, 1898, and September 1, 1899, respectively, and the gain or loss in 1899 over 1898:

Comparative Table — School Census, 1898-99

WARD	1898	1899	Gain	Loss
1.....	4,172	4,325	153	-
2.....	3,929	3,780	-	149
3.....	2,163	2,398	235	-
4.....	2,047	2,250	203	-
5.....	1,602	1,702	100	-

Totals.....	88,097	86,505	4,376	1,968

Total gain, 1899..... 3,408

INFANT MORTALITY IN MASSACHUSETTS CITIES.

The following study of infant mortality in each of the 32 cities of the Commonwealth, for the seven years 1891-97, is taken from the Thirtieth Annual Report of the State Board of Health of Massachusetts:

"In the twenty-eighth annual report of the Board a table is presented, giving the statistics relative to infant mortality in each of the 32 cities of the State for the ten years 1881-90.

"In the following table the figures are presented for the next seven years, 1891-97, with two parallel columns, by means of which the rank of each city may be compared for the two periods.

"In the two last columns the infant mortality of the State is taken as a standard of comparison, or mean of the whole period, the figure 100 representing the mean. The results may be read as follows: For every 100 deaths of infants under one year old, which occurred in the State during the seven years 1891-97, there were 165 in Fall River, 107 in Boston, 71 in Beverly, etc."

Infant Mortality of Cities, 1891-97

CITIES	Births	Deaths 0-1	Infant Mortality	RANK — THE STATE = 100

NOTE.— As the BULLETIN is sent to many officials and institutions in other cities and countries the following statement is introduced in explanation of the nature and source of the data contained in the tables referred to.

Table IV. is compiled from returns made by the Cemetery Department. — Table V. The Massachusetts Cremation Society is a private organization, to which the only crematory in Boston belongs. — Table IX. (1) The Brighton Abattoir is the only authorized abattoir within the city limits. It belongs to a private company, but is subject to the oversight and regulation of the Health Department of the city, in accordance with Chapter 144 of the Acts of the Legislature of 1876. (2) The Health Department derives its authority to order houses which it deems unfit for human habitation to be vacated or demolished from Chapter 219, Acts of 1897, and Chapter 222, Acts of 1899. (3) The Public Statutes (Chapters 57 and 60) require the mayor and aldermen of cities, and permit the selectmen of towns, to appoint inspectors of milk and inspectors of vinegar, and prescribe regulations relating to the storage and sale of milk and vinegar. By special acts of the Legislature (see Chapter 313, Acts of 1888, and Chapter 443, Acts of 1886) the appointment of milk inspectors in Boston is vested in the Boston Board of Health. — Table XII. Number of pupils means whole number of pupils belonging, i. e., enrolled on the dates specified, as returned to the Superintendent of Schools. — Table XV. is compiled from the reports made by the Real Estate Exchange and Auction Board of transfers and mortgages of real estate recorded at the Suffolk Registry of Deeds. — Table XVI. is compiled from data furnished the Statistics Department by the Collector of Customs of the port of Boston. — Table XVIII. is compiled from data furnished by the curator of the Museum of Fine Arts, which is a private institution.

APPENDIX.

VALUATION STATISTICS, 1899.

The first of the following tables deals with the amount of land taxed, the assessed value of the same, and the average assessed value per square foot for each ward and for the entire city by various classes of land. The material for the absolute figures contained in this table is to be found in the Report of the Assessing Department for the year 1899-1900 (City Document No. 3, 1900, page 46). In Table H of that report is given (1) the number of square feet of land taxed, including vacant land, but excluding marsh land and flats; (2) the number of square feet of vacant upland included under (1); and (3) the number of square feet of marsh land and flats. We have rearranged this material so as to show, in logical order, the exact number of square feet of occupied land, vacant upland, marsh and flats, and total vacant land, together with the grand total of square feet of land taxed (a fact not clearly shown by the Assessors). The figures of average valuation per square foot have been computed by us. For convenience of reference we add at the foot of the table the totals for the city for the previous year. Further details for 1898 may be found in a similar table, giving the valuation statistics for May 1 of that year, which was published in the MONTHLY BULLETIN, Vol. I., No. 7, page 23. A comparison of the totals for 1898 and 1899 shows that the total number of feet of land taxed has declined 3,663,234 square feet. This is probably due to the growth of property exempt from taxation, either in the form of new streets, or of property belonging to the city or to other authorities and institutions exempted from taxation. The number of square feet of occupied land increased 10,650,101 square feet, whereas the vacant upland declined 3,071,911 square feet, and the marsh land and flats declined 11,241,424 square feet. With regard to the value of land per square foot, the total land taxed has increased in value by \$0.036; occupied land, \$0.008; vacant upland, \$0.024 per square foot, while marsh land has declined \$0.012 per square foot.

EXTRAORDINARY RECEIPTS AND EXPENDITURES.

Two tables dealing with the extraordinary receipts and expenditures of the City of Boston for the period of five fiscal years ending January 31, 1898, are here published for the first time. They are taken from advanced sheets of a special publication now in press. In that publication these summary tables will be analyzed in detail, so that the history of each appropriation may be seen at a glance. The expenditures for each separate piece of work and the manner in which the expenditures were met will there be shown. Meanwhile the summary tables contain much that is of interest. These tables relate only to the the extraordinary receipts and expenditures of the city. The ordinary receipts and expenditures of the same period have been fully dealt with in our Special Publication No. 3. Extraordinary receipts consist in the proceeds of loans issued and in sums received to be credited to loan appropriations or to special appropriations for the construction of some public work. The extraordinary expenditures consist of payments from these loan and special appropriations. The first table gives a balanced statement of receipts and expenditures for each of the five years. The second table analyzes the income and outgo of the entire period by classes of expenditure. The balances at the beginning and at the end of the period, the loans issued, the receipts and the expenditures are here assigned to their proper class. The transfers here given represent the amounts transferred from one appropriation to another by order of the City Council. The transfers in the first table, on the other hand, are net amounts; both tables show for the five years a net transfer to these accounts of \$139,828.87.

CITY OF BOSTON

MONTHLY BULLETIN

OF THE

STATISTICS DEPARTMENT

MAY, 1900

Volume II.—No. 5

Contents: Tables I.-XVIII.

BOSTON
MUNICIPAL PRINTING OFFICE
1900

TABLE OF CONTENTS.

	PAGE
I. Meteorological Observations:	
May	3
II. Movement of Population:	
1. Monthly Mortality	4
2. Causes of Death by Sex	5-8
3. Causes of Death, by Age Periods	9
4. Weekly Mortality	10
III. Burial Permits issued by the Board of Health	11
IV. Interments in City Cemeteries	12
V. Cremations at Forest Hills	12
VI. Movement of Institutions Population:	
1. Pauper Institutions	13
2. Penal Institutions	14
3. Children's Institutions—A	15
4. Children's Institutions—B	16
5. Insane Institutions	17
VII. Immigration Statistics	17
VIII. Fire Department	18
IX. Health Department:	
1. Bureau of Cattle Inspection	19
2. Houses Ordered Vacated or Demolished,	19
3. Bureau of Milk Inspection	20
X. Library Department	20
XI. Police Department:	
1. Arrests	21
2. General Work	21
XII. Public Schools:	
1. Number of Pupils	22
2. Pupils in High and Latin Schools	22
XIII. Employment Certificates	23
XIV. Public Baths	23
XV. Statistics Relating to Real Estate	23
XVI. Commercial Statistics, Port of Boston:	
1. Number and Tonnage of Vessels	24
2. Value of Imports and Exports—Pas- sengers Arrived	24
XVII. Statistics Relating to Flour Supply.	25
XVIII. Muséum of Fine Arts—Number of Admissions	25

NOTE.— As the BULLETIN is sent to many officials and institutions in other cities and countries the following statement is introduced in explanation of the nature and source of the data contained in the tables referred to.

Table IV. is compiled from returns made by the Cemetery Department. — Table V. The Massachusetts Cremation Society is a private organization, to which the only crematory in Boston belongs. — Table IX. (1) The Brighton Abattoir is the only authorized abattoir within the city limits. It belongs to a private company, but is subject to the oversight and regulation of the Health Department of the city, in accordance with Chapter 144 of the Acts of the Legislature of 1876. (2) The Health Department derives its authority to order houses which it deems unfit for human habitation to be vacated or demolished from Chapter 319, Acts of 1897, and Chapter 222, Acts of 1890. (3) The Public Statutes (Chapters 57 and 60) require the mayor and aldermen of cities, and permit the selectmen of towns, to appoint inspectors of milk and inspectors of vinegar, and prescribe regulations relating to the storage and sale of milk and vinegar. By special acts of the Legislature (see Chapter 313, Acts of 1893, and Chapter 449, Acts of 1896) the appointment of milk inspectors in Boston is vested in the Boston Board of Health. — Table XII. Number of pupils means whole number of pupils belonging, i. e., enrolled on the dates specified, as returned to the Superintendent of Schools. — Table XV. is compiled from the reports made by the Real Estate Exchange and Auction Board of transfers and sales of real estate recorded at the Suffolk Registry of Deeds. — Table XVI. is compiled from data furnished the Statistics Department by the Collector of Customs of the port of Boston. — Table XVIII. is compiled from data furnished by the curator of the Museum of Fine Arts, which is a private institution.

NOTE. — As the BULLETIN is sent to many officials and institutions in other cities and countries, the following statement is introduced in explanation of the nature and source of the data contained in the tables referred to.

Table IV. Is compiled from returns made by the Cemetery Department. — Table V. The Massachusetts Cremation Society is a private organization, to which the only crematory in Boston belongs. — Table IX. (1) The Brighton Abattoir is the only authorized abattoir within the city limits. It belongs to a private company, but is subject to the oversight and regulation of the Health Department of the city, in accordance with Chapter 144 of the Acts of the Legislature of 1876. (2) The Health Department derives its authority to order houses which it deems unfit for human habitation to be vacated or demolished from Chapter 213, Acts of 1897, and Chapter 222, Acts of 1899. (3) The Public Statutes (Chapters 57 and 69) require the mayor and aldermen of cities, and permit the selectmen of towns, to appoint inspectors of milk and inspectors of vinegar, and prescribe regulations relating to the storage and sale of milk and vinegar. By special acts of the Legislature (see Chapter 313, Acts of 1893, and Chapter 449, Acts of 1895) the appointment of milk inspectors in Boston is in the Boston Board of Health. — Table XII. Number of pupils — number of pupils belonging, i. e., enrolled on the dates specified — to the Superintendent of Schools. — Table XV. Is compiled from the Real Estate Exchange and Auction Board of the City of Boston. — Table XVI. Is compiled from data furnished the Statistics Department by the Real Estate Exchange and Auction Board of the City of Boston. — Table XVII. Is compiled from the records of the Customs of the port of Boston. —

NOTE. — As the BULLETIN is sent to many officials and institutions in other cities and countries, the following statement is introduced in explanation of the nature and source of the data contained in the tables referred to.

Table IV. is compiled from returns made by the Cemetery Department. — Table V. The Massachusetts Cremation Society is a private organization, to which the only crematory in Boston belongs. — Table IX. (1) The Brighton Abattoir is the only authorized abattoir within the city limits. It belongs to a private company, but is subject to the oversight and regulation of the Health Department of the city, in accordance with Chapter 144 of the Acts of the Legislature of 1876. (2) The Health Department derives its authority to order houses which it deems unfit for human habitation to be vacated or demolished from Chapter 219, Acts of 1897, and Chapter 222, Acts of 1899. (3) The Public Statutes (Chapters 57 and 60) require the mayor and aldermen of cities, and permit the selectmen of towns, to appoint inspectors of milk and inspectors of vinegar, and prescribe regulations relating to the storage and sale of milk and vinegar. By special authority of the Legislature (see Chapter 313, Acts of 1893, and Chapter 449, Acts of 1896) the appointment of milk inspectors in Boston is vested in the Boston Board of Health. — Table XII. Number of pupils means whole number of pupils belonging, i. e., enrolled on the dates specified, as returned by the Real Estate Exchange and Auction Board of transfers and mortgages. — Table XV. is compiled from the reports made by the Real Estate Exchange and Auction Board of transfers and mortgages. — Table XVI. is compiled from data furnished by the Suffolk Registry of Deeds. — Table XVII. is compiled from data furnished by the curator of the Museum of Fine Arts, which is a private institution.

CITY OF BOSTON

MONTHLY BULLETIN

OF THE

STATISTICS DEPARTMENT

OCTOBER, 1900

Volume II.—No. 10

Contents: Tables I.-XVIII.; Appendix—Distribution of Population, by Wards, in Boston in 1895 and 1900; Boston School Census, 1900

BOSTON
MUNICIPAL PRINTING OFFICE
1900

TABLE OF CONTENTS.

	PAGE
I. Meteorological Observations:	
October	3
II. Movement of Population:	
1. Monthly Mortality	4
2. Causes of Death by Sex	5-8
3. Causes of Death, by Age Periods	9
4. Weekly Mortality	10
III. Burial Permits issued by the Board of Health	11
IV. Interments in City Cemeteries	12
V. Cremations at Forest Hills	12
VI. Movement of Institutions Population:	
1. Pauper Institutions	13
2. Penal Institutions	14
3. Children's Institutions—A	15
4. Children's Institutions—B	16
5. Insane Institutions	17
VII. Immigration Statistics	17
VIII. Fire Department	18
IX. Health Department:	
1. Bureau of Cattle Inspection	19
2. Houses Ordered Vacated or Demolished,	19
3. Bureau of Milk Inspection	20
X. Library Department	20
XI. Police Department:	
1. Arrests	21
2. General Work	21
XII. Public Schools:	
1. Number of Pupils	22
2. Pupils in High and Latin Schools	22
XIII. Employment Certificates	23
XIV. Public Baths	23
XV. Statistics Relating to Real Estate	23
XVI. Commercial Statistics, Port of Boston:	
1. Number and Tonnage of Vessels	24
2. Value of Imports and Exports—Pas- sengers Arrived	24
XVII. Statistics Relating to Flour Supply.	25
XVIII. Museum of Fine Arts—Number of Admissions	25

APPENDIX.

Distribution of Population, by Wards, in Boston in 1895 and 1900	26-27
Boston School Census, 1900	28

sent to many officials and institutions in other cities and countries, the following statement is introduced in explanation of the returns made by the Cemetery Department. — Table V. The Massachusetts Cremation Society is a private organization, and belongs to the oversight and regulation of the Health Department of the city, in accordance with Chapter 144 of the Acts of the Massachusetts Legislature, Chapter 222, Acts of 1899. (3) The Public Statutes (Chapters 37 and 60) require the mayor and aldermen of cities, and inspectors of milk and inspectors of vinegar, and prescribe regulations relating to the storage and sale of milk and vinegar. — Chapter 313, Acts of 1893, and Chapter 449, Acts of 1895 the appointment of milk inspectors in Boston is vested in the Mayor. Number of pupils means whole number of pupils belonging, i. e., enrolled on the dates specified, as returned from the reports made by the Real Estate Exchange and Auction Board of transfers and mortgages. — Table XVI. is compiled from data furnished by the Collector of the Museum of Fine Arts, which is a private institution.

APPENDIX.

DISTRIBUTION OF POPULATION, BY WARDS, IN BOSTON IN 1895 AND 1900.

The table below affords a comparative view of the distribution, by wards, of the population of Boston, as determined by the State Census in 1895 and by the National Census in 1900. Comparison of the population of 1900 with that of 1890, by wards, would be misleading, as the ward lines were changed in 1895. The table shows (1) the population of each ward; (2) the per cent. of the total population in each ward in 1895 and 1900; and (3) the increase or decrease of population in each ward between 1895 and 1900.

The table is used as the basis for the diagram on the opposite page. The diagram shows for each ward (1) the per cent. of population of the city found in the ward in June, 1900, (2) the total number of persons enumerated by the census officers, and

(3) the increase or decrease in the ward's population since 1895. For instance, the population of Ward XX (1) equals 5.80 per cent. of 560,892, the total population of Boston; (2) it numbered 32,556 persons in June, 1900, which is (3) an increase of 11,028 in population since May, 1895.

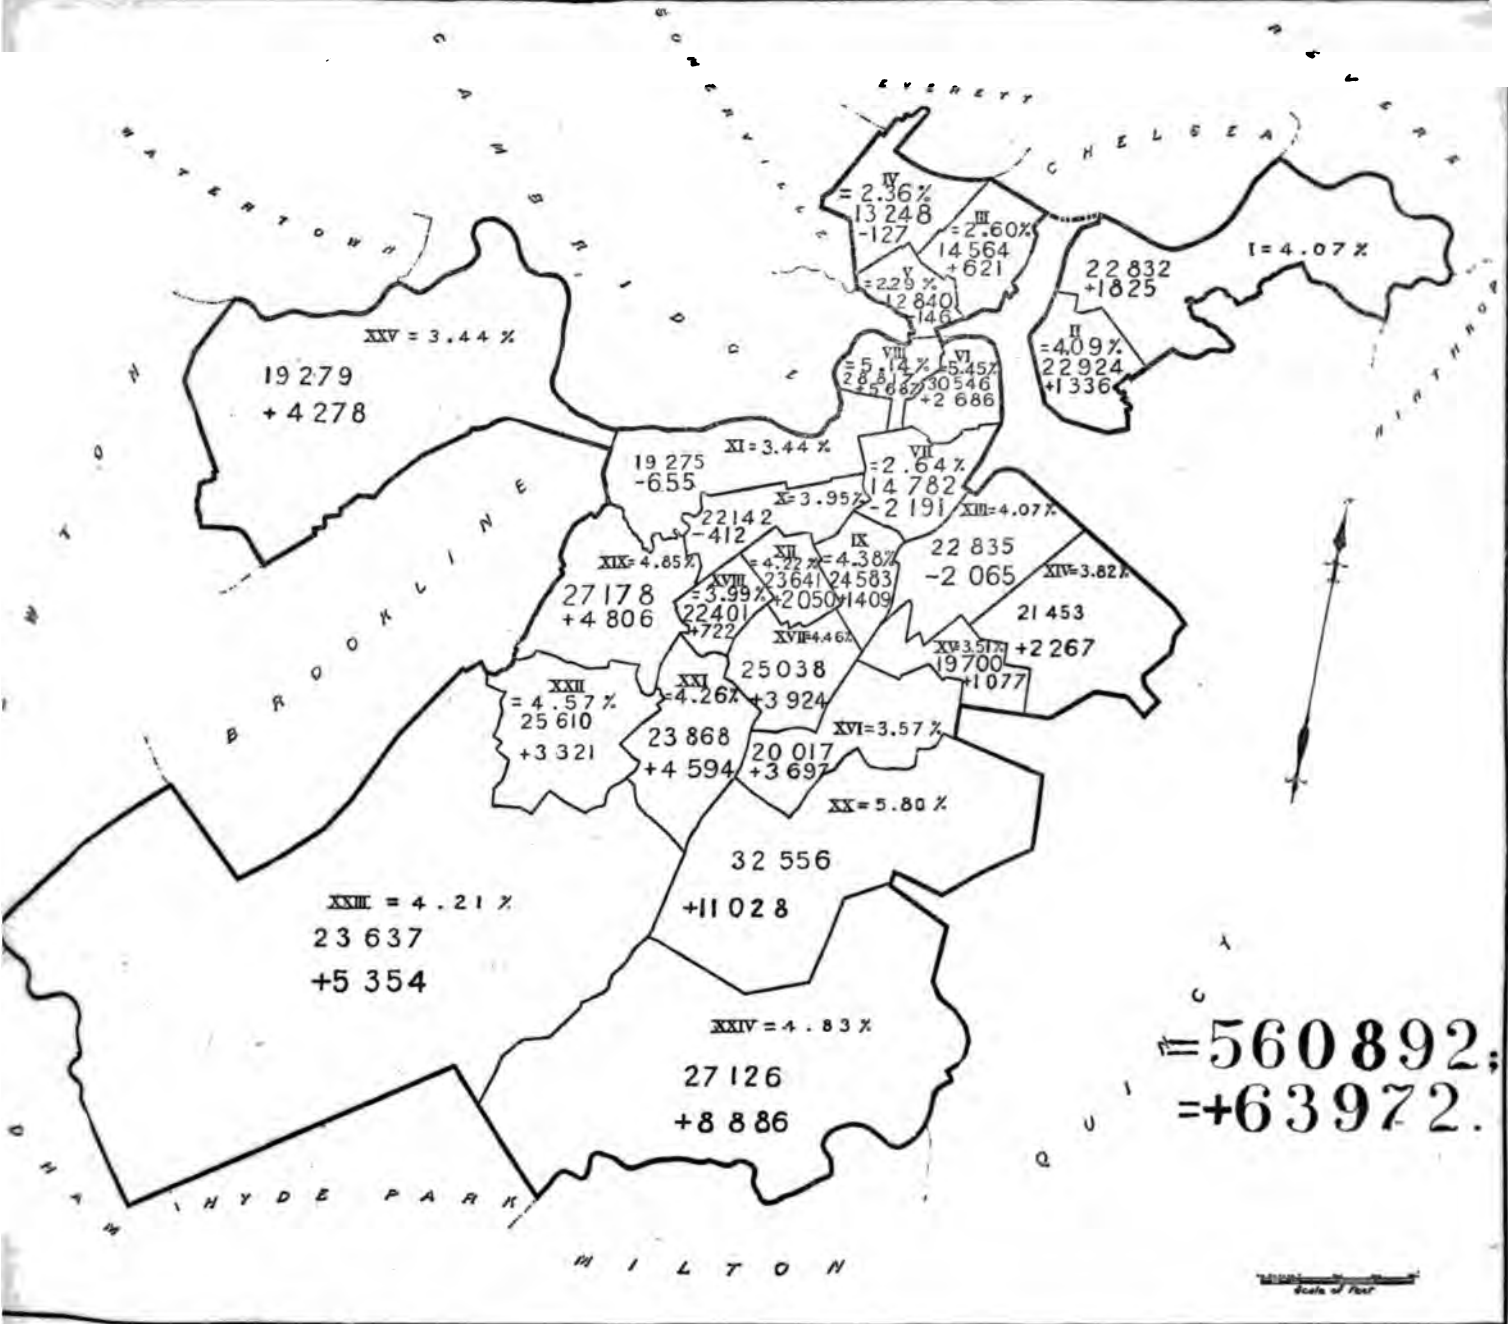

In 1895 the per cent. of population of the city found in the several wards ranged between 5.61 in Ward 6, with a population of 27,860, and 2.61 in Ward 5, with a population of 12,986; while in 1900 the per cents ranged between 5.80 in Ward 20 (population 32,556), and 2.29 in Ward 5 (population 12,840).

In comparison with 1895, nineteen wards show an increase of population ranging between 11,028 (33.87 per cent.), in Ward 20, and 621 (4.59 per cent.), in Ward 3; while six wards show losses as follows: Ward 7, 2,191, or 12.90 per cent.; Ward 13, 2,065, or 8.29 per cent.; Ward 11, 655, or 3.28 per cent.; Ward 10, 412, or 1.82 per cent.; Ward 5, 146, or 1.12 per cent., and Ward 4, 127, or 0.95 per cent.

Table Showing, by Wards, (1) Population of Boston in 1895 and in 1900, (2) Increase or Decrease since 1895, and (3) Per Cent. of Population in Each Ward.

Ward	Population in 1895 (State Census)	Per Cent. of Entire City Population 1895	Population in 1900 (National Census)	Per Cent. of Entire City Population 1900	Increase (+) or Decrease (—) 1895 to 1900	Ward

Totals.....			100			

MAP SHOWING (1) THE POPULATION OF BOSTON IN 1900, (2) CHANGE SINCE 1895, BY WARDS, AND (3) PER CENT. OF POPULATION IN EACH WARD IN 1900.

We may group the wards in classes, according to the per cent. of the total population found in each ward, as follows :

The 5 per cent. class in 1895 comprised Wards 6 and 13 ; and in 1900, Wards 20, 6, and 8.

The 4 per cent. class in 1895 comprised 12 wards, viz.: 1, 2, 8, 9, 10, 11, 12, 17, 18, 19, 20, 22 ; and in 1900, 11 wards, viz.: 1, 2, 9, 12, 13, 17, 19, 21, 22, 23, and 24.

The 3 per cent. class in 1895 comprised 8 wards, viz.: 7, 14, 15, 16, 21, 23, 24, and 25 ; in 1900, 7 wards, viz.: 10, 11, 14, 15, 16, 18, and 25.

The 2 per cent. class in 1895 comprised 3 wards, viz.: 3, 4, and 5 ; in 1900, 3 wards, viz.: 3, 4, 5, and 7.

The population of Boston increased 63,972, or 12.87 per cent.—the increase being 448,477 to 560,892, or 25.0 per cent.

the 14 municipalities which surround the city on the North and South, increased to 297,573.

This may be termed the population of the "First Zone" of the Metropolitan District. This zone, as shown by the census of 1900, contains a population of 348,002, being an increase of 50,429, or 16.94 per cent. since 1895. (The increase since 1890 was 95,544, or 39.40 per cent.).

Comparing the growth of Boston and that of the First Zone of the Metropolitan District, we have the following results :

INCREASE OF POPULATION :

1895-1900.

In Boston.....63,972, or 12.87 per cent.

In First Zone...50,429, or 16.94 " "

1890-1900.

In Boston....112,415, or 25.06 per cent.

In First Zone..95,544, or 39.40 " "

It appears, therefore, that the growth of the immediate, enclosing suburbs of Boston was 4.07 per cent. greater than that of the city itself in the period 1895-1900 ; and was 14.34 per cent. greater in the period 1890-1900.

BOSTON SCHOOL CENSUS, 1900.

The results of the annual School Census, taken in September, 1900, under the direction of the School Committee of Boston, are given in the following table, which shows, by wards, the number of persons 5 to 15 years of age who were (1) attending a public school, (2) attending a private school, (3) not attending any school. The table also shows, by sex, the distribution of the school population by wards, under the heads of "5 and 6 years of age," "7 to 13 years of age," and "14 years of age."

The total school population returned as of September 1 numbered 90,144, an increase of 3,639 since 1899. (See "Boston School Census" of 1899, p. 32, March number of the current volume of this BULLETIN).

The following summary statement affords a comparison of the results, as regards certain leading facts, of the enumeration of school population in 1899 and 1900 :

PERSONS 5 TO 15 YEARS OF AGE:

	In Public Schools.	In Private Schools.	Not in School.	Totals.
1900.....	69,260	14,083	6,801	90,144
1899.....	66,221	13,515	6,769	86,505
Increase....	3,039	568	32	3,639

It appears from the table that Ward 6 has the largest quota of the school population, viz.: 5,693, and Ward 11 the smallest, viz., 1,346; that Ward 20, which is the most populous

ward of the city (see table on page 26), has the largest number (4,499) in the public schools, Ward 11 having the least (858) ; that the largest contingent of the school population found in private schools is 1,941, in Ward 2, the smallest (15) being in Ward 25 ; and that the largest number not attending school, viz., 690, is in Ward 22, and the smallest number is 64, in Ward 4.

It is noteworthy that a relatively large proportion of the persons returned as attending private schools is found in four wards, viz.: Ward 1 (1,198), Ward 2 (1,941), Ward 13 (1,175), and Ward 19 (1,814), amounting to 6,128, or 43.51 per cent. of the total (14,083) in 1900. In 1899 the corresponding total number found in the same wards was 5,763, or 42.57 per cent. of the total (13,515).

In 1899 there were five wards returned as having upwards of 500 persons of school age "Not at School," viz.: Ward 6, 539, Ward 14, 502, Ward 17, 729, Ward 19, 521, and Ward 22, 529; total, 2,820, or 41.66 per cent. of the whole. In 1900 only four wards were returned as having upwards of 500 "Not at School," viz.: Ward 6, 603, Ward 8, 577, Ward 13, 541, and Ward 22, 690; total 2,411, or 35.45 per cent. of the whole number included in this category.

The total population of Boston increased 12.87 per cent. in the period 1895-1900, as is shown on page 27 ; while, according to the School Census, the number of persons 5 to 15 years of age increased from 77,152 to 90,144, or 16.83 per cent., in the same period — hence it would appear that the school population is increasing rather more rapidly than the total population in Boston. If this be true, it may be owing, in a measure, to the immigration of persons of school age in order to avail of the benefits of the Boston schools.

TABLE SHOWING RESULTS, BY WARDS, OF THE SCHOOL CENSUS, SEPTEMBER 1, 1900.

Totals	29,144															

The mean per cents. of actual to possible vote cast for the principal City officers, and on the question of license, in the period 1895-1899, appear from Table III. to be as follows : For Mayor, 80.12 ; for Street Commissioner, 71.36 ; on License, 69.23 ; for Aldermen, 68.43 ; for Councilmen, 67.52 ; for School Committee, 62.80.

Tables I. and II. show a falling off of interest on the part of the voters in all of the elections noted therein (excepting the election of Mayor), when the period 1890-1894 is compared with the period 1895-1899. This is most notable as regards the gubernatorial elections, whose relative per cent. was 95.49 for the first half and 82.97 for the second half of the decade.

For the sake of comparison with similar figures in the tables, the following statement of results of elections in 1900

is introduced in advance of the publication of the report of the Election Commissioners :

STATE ELECTION, 1900.

	Possible Vote.	Actual Vote.	Per Cent. of Actual to Possible.	Relative Per Cent. Scale of 100.	Compared with Relative Mean, 1890-1899.
President	106,329	83,860	78.87	93.38	-6.62

NOTE :—The Monthly Summary of Commerce and Finance for December, 1900, published by the Treasury Department, Washington, D. C., gives corrected totals for the year as follows :

	IMPORTS.	EXPORTS.	TOTAL TRADE.
1900.....	\$68,740,782	\$123,867,754	\$192,608,536
1899.....	63,203,900	127,162,843	190,515,183

The corrections are not given by months, wherefore it is impossible to enter the corrections in the table. The total exports for 1900, viz., \$127,162,843, exceed by \$36,000 the figures given in the Monthly Summary for December, 1900.

			Old age.....	415	212
			Violent deaths.....	561	620

the in the zymotic group in 1900 over that of 1899 is chiefly due to the incorporating into this group of pulmonary, with some forms of diarrhoeal diseases.

ANALYSIS OF VOTES ON REFERENDA, 1890-99.

An analysis of the votes cast in Boston during the decade 1890-1899, on questions decided by a referendum, is given in the following table. Twenty-one questions were so decided. In all cases save one the votes were cast by men. Of the twenty referenda on which men voted, ten (relative to licensing the sale of intoxicating liquors) recurred annually, and ten, relating to a variety of questions, occurred at irregular intervals.

Comparison of the per cents of actual to possible vote contained in this table with those given under the head of "Boston Elections, 1890-1899," in the last number of this BULLETIN, shows that, as a rule, the voters of Boston show less interest in referenda than in electoral contests for the principal offices. Thus, in the five years 1895-1899, in which the mean per cent. of actual to possible vote was 69.23 on license and 66.31 on all other referenda (against 64.63 on license and 48.50 on other questions for the five years 1890-1894), the mean per cents of actual to possible vote cast for the principal City officers and on referenda were as follows: For Mayor, 80.12; for Street Commissioner, 71.36; for Aldermen, 68.43; for Councilmen, 67.52; for School Committee, 62.80; on all Referenda, 67.53; on License, 69.23; on other questions, 66.31.

During the period 1890-1899, the per cents of actual to possible vote on license ranged between 75.38 in 1899 and 57.00 in 1893, the mean per cent. being 67.15; while in respect to referenda on questions other than license, the per cents ranged between 75.63 in 1899, on the question of Replacing Street Railway Tracks on Tremont Street, and 33.40 in 1894, on Incorporating the Elevated Railway. As a rule, more interest was shown in questions submitted to the voters at Municipal than at State or Special Elections.

The relative interest shown by the voters in other than license questions is shown in the following statement:

QUESTION SUBMITTED.	PER. CENT OF ACTUAL TO POSSIBLE	
	YEAR.	VOTE.
1. Replacing Tracks on Tremont Street.....	1899	75.63
2. Acceptance of Eight-hour Law.....	1899	73.21

OF THE

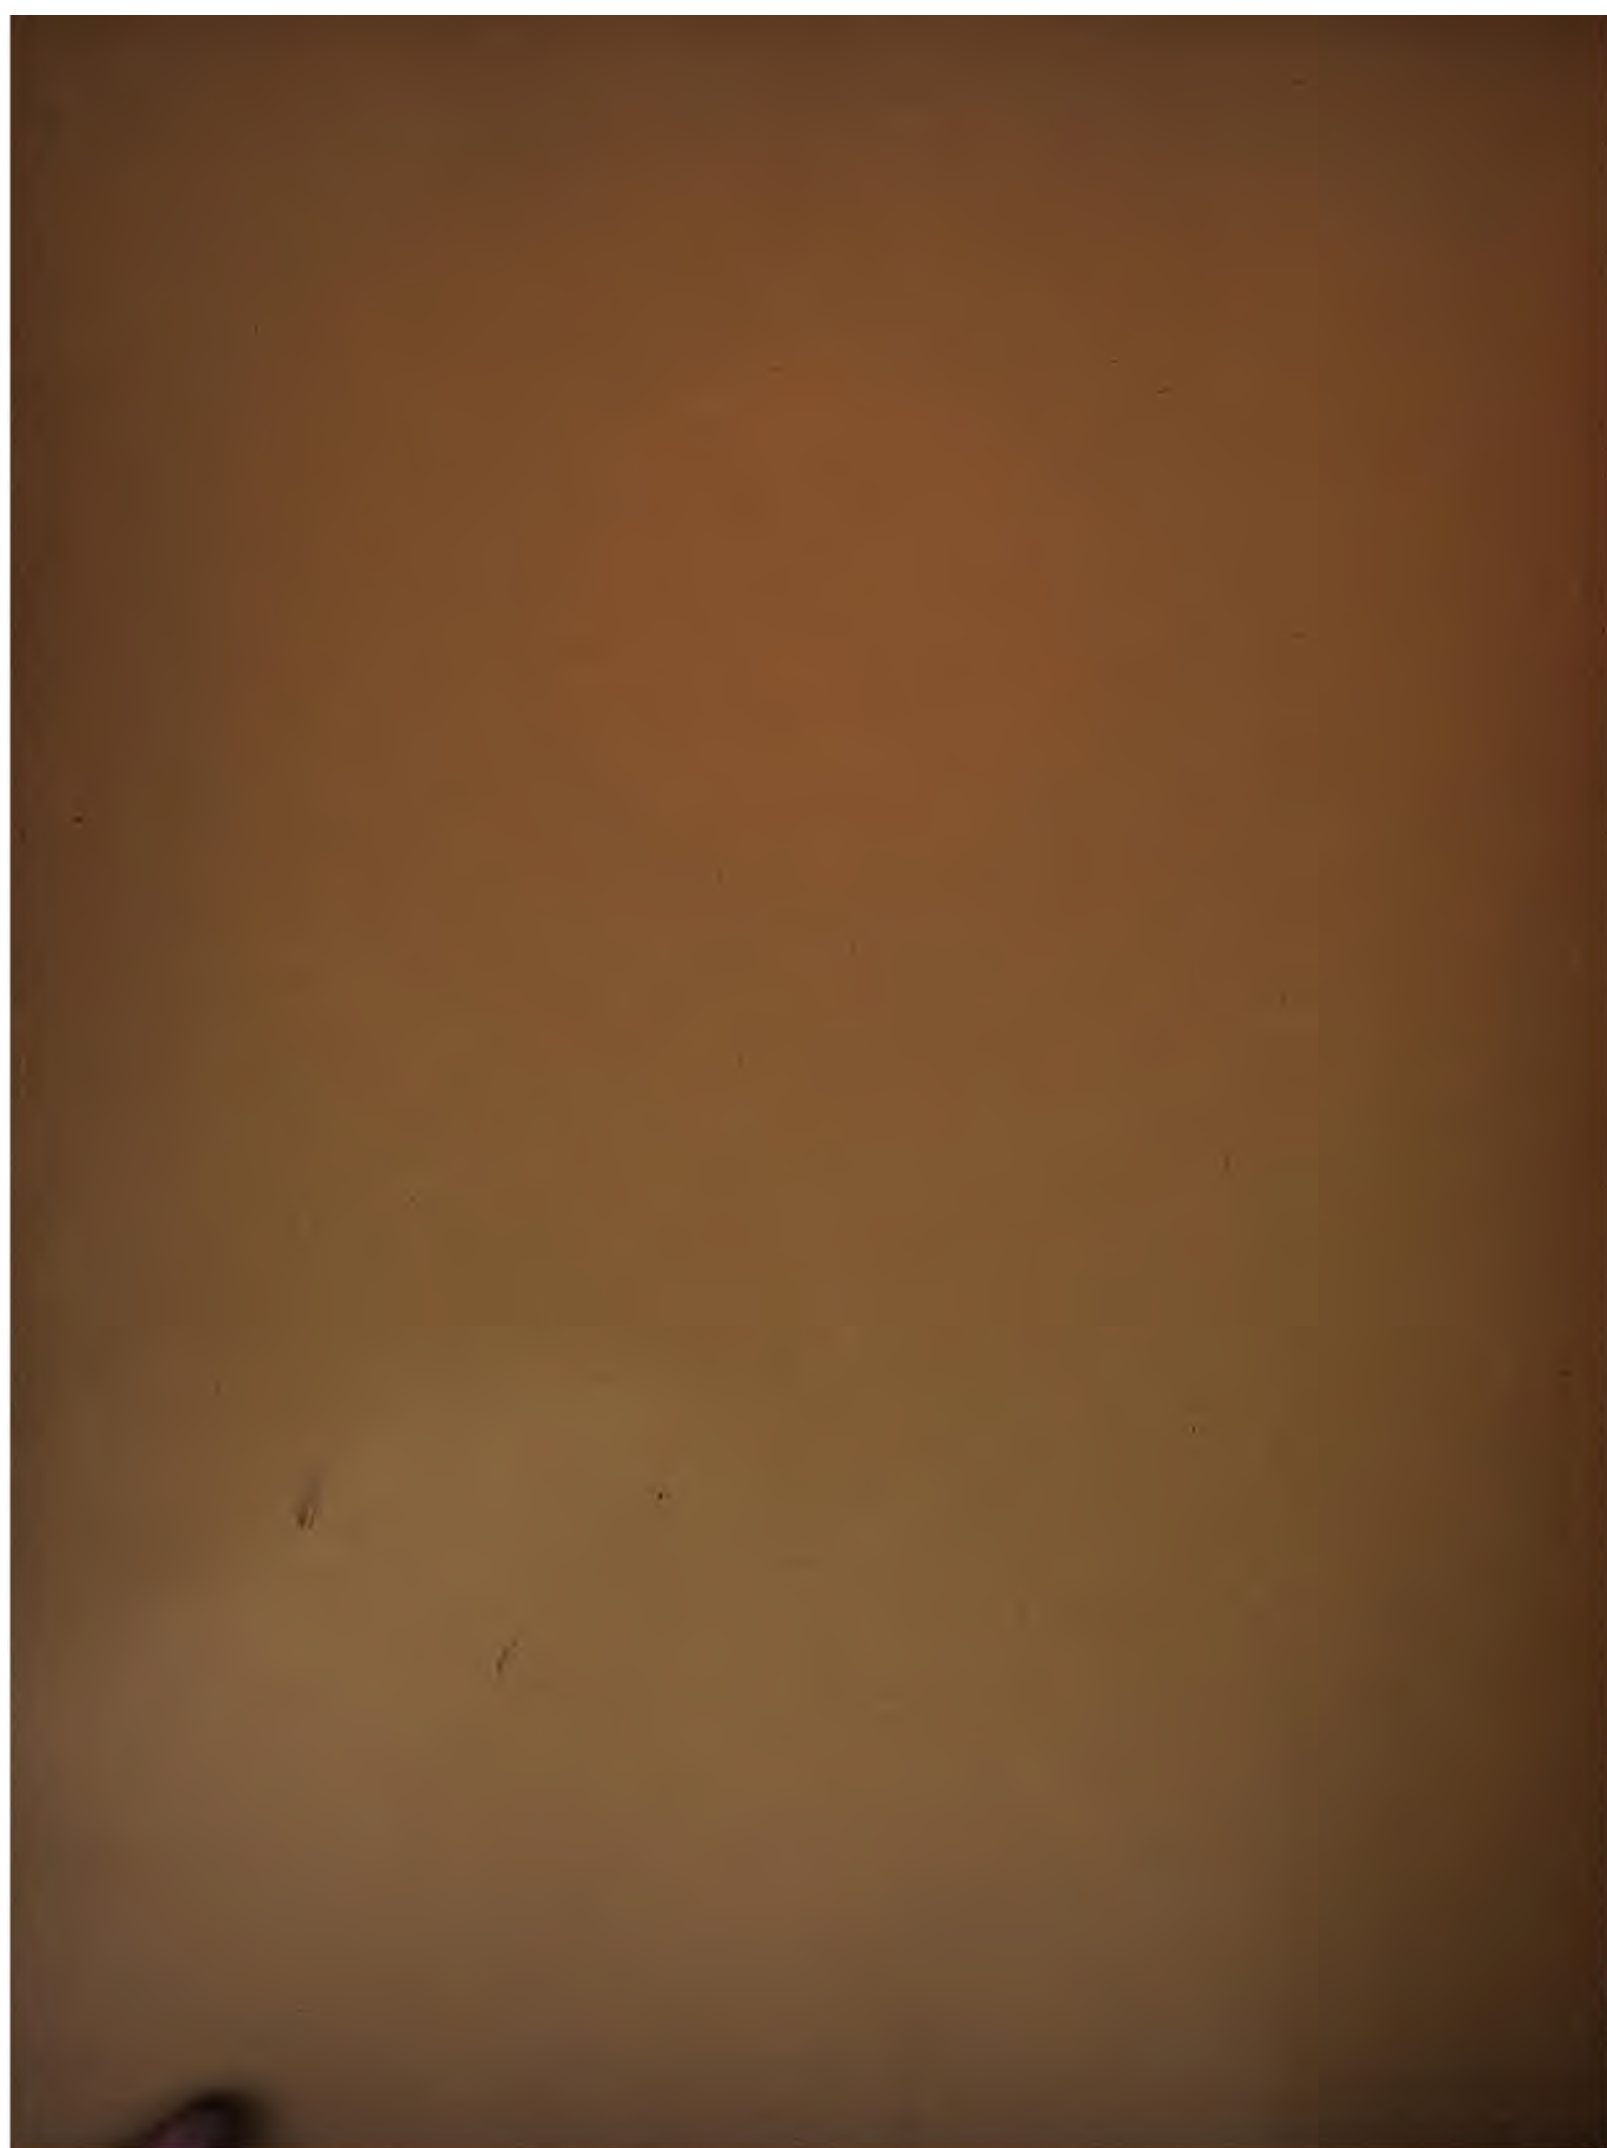

STATISTICS DEPARTMENT

MAY, 1899

Volume I—Nos. 1, 2, 3, 4 and 5

BOSTON
MUNICIPAL PRINTING OFFICE
1899

**PUBLICATIONS OF THE STATISTICS DEPARTMENT
OF THE CITY OF BOSTON.**

Annual Report of the Department of Municipal Statistics,
for the nine months ending January 31, 1898. Boston: Municipal
Printing Office. 1898. 20 pp. 8vo. [Postage, one cent.]

Second Annual Report of the Statistics Department, for the
year ending January 31, 1899. Boston: Municipal Printing
Office. 1899. 15 pp. 8vo. [Postage, one cent.]

Special Publications No. 1. Estimates, Appropriations and
Actual Expenditures of Ordinary Revenue, 1892-96; Comparative
Tables for five years. Boston: Municipal Printing Office. 1898.
106 pp. 4to. [Postage, seven cents.]

Special Publications No. 2. Ordinary Revenue, 1892-96; Compar-
ative Tables for five years. Boston: Municipal Printing Office.
1898. 39 pp. 4to. [Postage, three cents.]

Special Publications No. 3. Receipts and Expenditures of Or-
dinary Revenue, 1893-97; Comparative Tables for five years.
Boston: Municipal Printing Office. 1899. 135 pp. 4to. [Post-
age, nine cents.]

Monthly Bulletin of the Statistics Department. Volume I.
Boston: Municipal Printing Office. 1899. 4to. Issued monthly.
[Postage on single numbers, two cents.]

The City Record, Official Gazette of the City of Boston.

Edited under direction of the Statistics Department; published
weekly. Boston: Municipal Printing Office. Volume I., 1898,
contains 736 pages (4to.) with an index of 19 pages. [Price,
\$2.00 a year; single copies, five cents.]

The City Record is a gazette; not a newspaper or an organ of
opinion. It contains transcripts of the official communications
of the Mayor to the City Council and heads of departments, and
of the enactments of the City Council and the School Committee;
abstracts of the records of the meetings of the principal execu-
tive boards; departmental communications and abstracts of
departmental reports; advertisements of proposals on public
work, etc., and reports of the canvass of bids and the award
of contracts for certain classes of city work, and information
regarding the action of the Legislature and Courts on matters
relating to the City of Boston. It also contains a considerable
amount of statistical information relating to municipal affairs.

Copies of the Publications named in the foregoing list will be
mailed to any address on receipt of the price of postage, and The
City Record will be sent on receipt of subscription at the rate of
\$2.00 per year; or five cents for single copies.

Address

EDWARD M. HARTWELL, *Secretary,*
Statistics Department,
Room 71, City Hall,
Boston, Mass.
